

## SCC Exec Meeting

October 19, 2006

- GSB Budgeting:
  - Items can either be criteria or non-criteria
  - Under each one you will have a list of each item
  - There will be a different category for income
- Is there a problem with having criteria and non-criteria listed together?
  - Has long as we can tell the difference and we can read it
- There would be a line to choose either criteria or non-criteria, on budget
- If you wanted to buy something and only want GSB to pay for half you would have to enter it in twice and write in the rationale
- It is better to take the cut out by hand when SCC has to cut money from each budget then to automate it.
- We can lock and unlock the budgets, we allow them to put the budget up (going to start in Jan.), allow them to build budgets (workshop sessions), final drafts due a week before they are due to GSB., and at certain times they can go through and edit it
- A few lines to see at the top of budget: current members (male, female)
- What was hoping to get done today: writing up what the budget would look like
- Another time to meet?: plan on meeting again on November 2, 2006 @ 10am, will be advised on what room
